

2006 Julie Nester Gallery Presents

Artville, July 1 - 26, 2006

Julie Nester Gallery is pleased to present "Pacifica", an exhibit of new paintings by Marshall Crossman from July 1 through July 26. Marshall Crossman's work is about the painting process and the inspiration of the topic. She uses a unique painting technique where she paints "wet on wet" — a process of applying base layers and then adding in layers of other colors on top, while the base layer is still wet. The result is a highly textured, deeply colored surface. In each painting she wanders through many stages of paint action and destruction before arriving at a finish that feels resolved to her eye. "Pacifica" is a continuation of Crossman's latest volume of work, "Beach Series", and includes images of people playing in the surf and fishermen showing off their catch. This will be Crossman's first solo exhibition in Utah. She has had previous exhibitions in San Francisco, Atlanta, Boston, New York and San Diego.
